FINAL REPORT

1980 CENSUS OF POPULATION AND HOUSING

QUEZON

REPUBLIC OF THE PHILIPPINES

NATIONAL ECONOMIC AND DEVELOPMENT AUTHORITY

NATIONAL CENSUS AND STATISTICS OFFICE

MANILA

REPUBLIC OF THE PHILIPPINES NATIONAL ECONOMIC AND DEVELOPMENT AUTHORITY

HIS EXCELLENCY PRESIDENT FERDINAND E. MARCOS Chairman

Honorable VICENTE B. VALDEPEÑAS, JR. Minister of Economic Planning and

Director-General of the Authority

NATIONAL CENSUS AND STATISTICS OFFICE

TITO A. MIJARES

Executive Director & Civil Registrar-General

MARCELO M. ORENSE Assistant Executive Director

FOREWORD

This report is one of a series of provincial reports on the results of the 1980 Census of Population and Housing conducted on May 1, 1980.

Demographic data presented herein consist of population distributions according to age, sex, marital status, highest grade completed and literacy. Other bases as gainful occupation, industry and migration are included likewise.

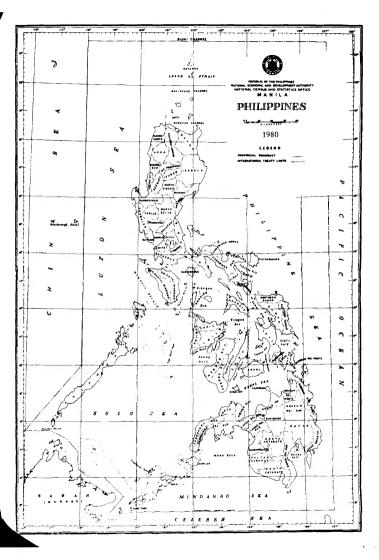

In the other aspect of the census, the following housing characteristics are considered: type of building, structural characteristics, floor area, type of tenure, use and source of water supply, lighting, type of toilet facilities, kind of cooking fuel used and appliances.

Subsequent issues will be the National Summary (Volume II) containing summary data on the final provincial reports and the Special Volume on National Capital Region (Metro Manila Area) which will cover data on the social, economic and demographic characteristics of the region.

Grateful acknowledgment is due the National Census Coordinating Board, government agencies, committees and the local coordinating boards for their invaluable assistance and cooperation.

TITO A. MIJARES

Manila, Philippines May 1983

Explanatory Text

GENERAL

INTRODUCTION

The National Census and Statistics Office conducted in May 1980, the 1980 Census of Population and Housing. This type of Census was also undertaken in May 1970. In May 1975 the Census of Population was taken as Phase I of the 1975 Integrated Census of the Population and Its Economic Activities, This nationwide undertaking was designed to obtain comprehensive data on the size, distribution, structure, change 'and socio-economic characteristics of the population and to take inventory of the housing accommodations, their geographic location, structural characteristics, available facilities, etc.

The population report contains data gathered from private households as well as collective households, while data on housing were collected from private households only.

It should be emphasized at this point that a complete enumeration of all households throughout the country was made but only sample household questionnaires representing 20 percent of the listed households were processed and the data published in this volume. In so doing, however, the total population count by barangay, male and female, obtained from the listing sheet taken simultaneously during the enumeration was maintained in computing the evights or expansion factors. It should also be noted that data on Tables 1 to 4 of the population tables refer to total population, that is, the population of the private households plus the collective households while Tables 5 to 10 cover exclusively the private household population.

Pursuant to the provision of Batas Pambansa Bilang 72, a final count of the population, by sex at barangay level was submitted to the President and was approved under Proclamation No. 2170 dated March 12, 1982. This report was published separately in 74 provincial volumes.

AUTHORITY FOR THE 1980 CENSUS

Under Commonwealth Act No. 591, the National Census and Statistics Office is authorized "to prepare for and undertake all censuses of population, agriculture, industry and commerce."

It may be mentioned in this regard that sometime in February 1980 Parliamentary Bill No. 809 was presented at the Batasang Pambansa, providing for the taking of an integrated census every ten years beginning 1980, with May 1 of every oensal year as the reference date. This bill was approved into Batas Pambansa Bilang 72 on June 11, 1980, more than one month after the start of enumeration.

INTER-AGENCY PARTICIPATION

The expertise and technical advice of the National Economic and Development Authority Inter-Agency Committee on Population and Vital Statistics and its Technical Working Group on 1980 Census of Population and Housing played a vital role in the successful undertaking of the census.

The Committee's main function was to review the questionnaire, methodologies, concept, tabulation and other related aspects of the census in the production of data and development of systems that would produce more reliable and accurate result. It had for its chairman the Dean of the University of the Philippines Population Institute (UPPI) and for its members, one representative each from the Ministries of Human Settlements (MHS), National Defense (MND), Education and Culture (MEC), Health (MOH) and Local

Government and Community Development (MLGCD); the Commission on Population (POPCOM); National Economic and Development Authority (NEDA); and two representatives from the National Census and Statistics Office (NCSO). The Technical Working Group (TWG) for the 1980 Census of Population and Housing was headed by the Chief of the National Census and Household Surveys Department of NCSO and the members were representatives from the MHS, EPRS-NEDA, SCO-NEDA, POPCOM, UPPI, MOH, MEC, and the National Housing Authority (NHA).

Recommendations were likewise solicited from other government agencies for questions that should possibly be included in the population and housing portions in order to fill their data needs

As early as August 1977, an NCSO Technical Committee for censuses was created. Ranking officials of the National Census and Statistics Office comprised the committee, with the Assistant Executive Director as Chairman, the Chief of the National Census and Household Surveys Department (NCHSD) as Vice-Chairman and Heads of six other departments and staff offices as members.

The committee coordinated with the Inter-Agency Committee and TWG of the NEDA on the technical aspect of the census and rendered a monthly progress report to the Executive Director. It provided the overall direction of the activities of the different subcommittees on census. The two subcommittees created, the Sub-Committee on Population and Housing Census and the Sub-Committee on Operations and Logistics Support, were directly charged with the preparatory work for the census undertaking.

CENSUS BOARDS

A systematized involvement of government agencies and instrumentalities was made possible largely through the concerted efforts of the members of the National Census Coordinating Board (NCCB) and the Provincial, City and Municipal Census Boards. The national board was created by NEDA Memorandum Order No. 4-80, dated April, 1980 and the local boards, by Memo Order No. 5-80, dated April 1, 1980, by virtue of the powers vested in the Minister of Economic Planning under Section 3 of Presidential Decree No. 1200.

The NCCB was headed by the Minister of Economic Planning as Chairman with the Executive Director as Executive Officer. Named as members were the Ministers of Agriculture, Budget, Education and Culture, Finance, Human Settlements, Public Works, Justice, Labor, Local Government and Community Development, National Defense, Natural Resources, Public Highways, Public Information and Transportation and Communication. Rules and regulations necessary for the successful undertaking of the census were issued by the Board.

At the local government level, similar functions were carried out by the Provincial City and Municipal Census Boards. The Provincial Governor headed the Provincial Census Board while the Division Superintendent of Schools was Vice-chairman. Members were the Highway District Engineer, Provincial Auditor. Provincial Commander of the Philippine Constabulary, the Provincial Development Officer and the Provincial Agriculturist. The City Census Board was composed of the City Mayor as Chairman, City Superintendent of Schools, Vice-chairman; and the City Engineer, City Assessor and City Development Officer, members. Finally, the Municipal Census Board had for its Chairman the Municipal Mayor and ably assisted by the District Supervisor as Vice-chairman. The members were the Municipal Agriculturist, Station Commander, Municipal Treasurer and the Municipal Development Officer.

For each of these local census boards, the Provincial Census Officer, City Census Officer and the Municipal Census Officer were designated Executive Officer of their respective Board.

CENSUS ORGANIZATION

The overall direction and instructions for the census undertaking emanated from the Executive Director of the National Census and Statistics Office or in his absence, the Assistant Executive Director.

Assisted by the Task Force from the Central Office and in coordination with the local census boards, the Regional Census Officers and the Provincial Census Officers directly supervised the field operations in their respective areas. The services of District Supervisors, Head Teachers and elementary school teachers from public schools were utilized as City/Municipal Census Supervisors, Team Supervisors and Enumerators in that order.

During the field operations, the 1980 Census Operations Center under the overall supervision of the National Census and Household Surveys Department Chief, was the operating body that monitored the overall operations. Lending support to the center were the Administrative and Fiscal Services Staff.

METHOD OF ENUMERATION AND USE OF SAMPLING

The household was used as the enumeration unit and a complete listing of dwelling units, including vacant ones, was done.

A combination of complete enumeration and sampling was adopted. While all households were asked on the count of the population and housing characteristics, only twenty percent (20%) were asked on other characteristics. The selection of sample households was done systematically with a random start from a listing of households which was prepared simultaneously with the enumeration.

Using PH Form 2 (Common Private Household Questionnaire) and with an 80 percent coverage, the items asked on population were household membership, relationship to head, line number of mother, sex, date of birth, age as of last birthday and marital status. For the housing items, the type of building and the construction materials of roof and outer walls, number of rooms, floor area of the dwelling unit and the year the building was built were asked.

In addition to the population and housing items just mentioned, additional information were asked using PH Form 3 (Sample Private Household Questionnaire) from the 20 percent samples such as language or dialect generally spoken at home, citizenship, usual residence of mother at person's birth, residence of person in 1975, ability to speak Pilipino and English, school attendance, highest grade completed, literacy, economic activity of the person, place of schooling or work, fertility, nature of occupancy of the dwelling unit and housing facilities and conveniences.

Collective households were enumerated using PH Form 4, where the information asked were the same as those in PH Form 2, excluding housing items.

PLACE WHERE ENUMERATED

All persons were enumerated in their usual place of residence, which is the geographic place (street, barangay, sitio, municipality or province) where the enumerated person usually resides. As a rule, it is the place where he usually sleeps; therefore, it may be the sa ne as or different from the place where he was found at the time of the census.

POST ENUMERATION SURVEY

Originally the plan was to conduct a Post Enumeration Survey covering the whole country. For lack of funds the survey had to be confined to Metro Manila. Its purpose was to determine the extent of underenumeration or overenumeration in the 1980 Census of Population and Housing.

A sample of 132 barangays was selected. However, in 59 barangays which were divided into two or more enumeration areas (EAs), an enumeration area was chosen as sample.

A complete listing was made of households in the sample barangays/EAs using PH Form 1-B. Twenty percent of these households were selected as sample households and interviewed using PH Form 2, which was the same questionnaire used for non-sample households during the main enumeration. The housing portion of this form was disregarded.

CONTENT AND COVERAGE OF THE PUBLICATION

In this publication, the population and households were described according to the respective items listed below: D 1 11 14

ropulation items	nousing items
Age	Type of Building
Sex	Type of Occupancy
Marital Status	Construction Materials of Roof and Outer Walls
Highest Grade Completed	Year Built
Literacy	Floor Area of Dwelling Unit
Language/Dialect Spoken in the	Tenure of Owner-Occupant with Respect

Household to the Land Kind of Lighting Facilities Gainful and Non-Gainful Occupation Major and Minor Industry Use and Source of Water Supply Migration

Type of Toilet Facilities Kind of Cooking Fuel Household Appliances

TT 1 To ...

The above items are presented in the ten population tables and nine housing tables of this report.

Except for figures on total population and sex, all other characteristics were based on a 20 percent sample.

Aside from these published tables, 10 other tables on the above characteristics plus 6 statistical tables dealing on ever-married women 15 years old and over are also available to statistical users.

DEFINITION OF TERMS AND CONCEPTS

I - POPULATION

BARANGAY

A barangay is the smallest political unit in the country and generally its enumeration is

assigned to one enumerator. For enumeration purposes, a large barangay is usually split into parts and each part is called an enumeration area (EA).

ENUMERATION AREA

An enumeration area (EA) is a delineated area assigned to one enumerator, usually consisting of about 300 households. A barangay or part of a barangay may have been designated as an enumeration area.

URBAN AND RURAL AREAS

The same concepts used in the 1970 and the 1975 Censuses were followed in classifying areas as urban. According to these concepts, urbanized areas consist of:

- In their entirety, all cities and municipalities having a population density of at least 1,000 persons per square kilometer.
- Poblaciones or central districts of municipalities and cities which have a population density of at least 500 persons per square kilometer.
- 3. Poblaciones or central districts (not included in 1 and 2), regardless of the population size, which have the following:
 - Street pattern, i.e., network of streets in either parallel or right-angle orientation:
 - At least six establishments (commercial, manufacturing, recreational and/or personal services); and
 - At least three of the following:
 - A town hall, church or chapel with religious services at least once a month;
 - A public plaza, park or cemetery;
 - A market place or building where trading activities are carried on at least once a week;
 - A public building like a school, hospital, puericulture and health center or library.
- Barangays having at least 1,000 inhabitants which meet the conditions set forth in 3 above, and where the occupation of the inhabitants is predominantly nonfarming or fishins.

All areas not falling under any of the above classifications are considered nural.

PERSONS ENUMERATED IN A PRIVATE HOUSEHOLD

The following were counted and enumerated as members of the household:

- Persons whose usual place of residence is the place where the household lives and
 present at the time of visit of the enumerator, except those born after 12:01 A.M.,
 May 1, 1980;
- Persons whose usual residence is the place where the enumerated household lives, but temporarily away at the time of enumeration, such as:
 - persons temporarily away on vacation, business or pleasure trip or any other purpose in the Philippines who are expected to be back within six months,

- or within one year, if abroad:
- students who usually go home to their respective households at least once a week;
- persons working elsewhere who usually go home to their respective households at least once a week;
- d. patients confined in hospitals for not more than six months at the time of enumeration of the household, except those confined (1) as inmates (not patients in wards for temporary confinement) in tuberculosis pavilions;
 (2) in mental hospitals;
 (3) in leprosaria or leper colonies;
 and (4) in rehabilitation centers for drug addicts;
- e. trainees in the Armed Forces of the Philippines, if their training is not more than six months;
- f. convicts and detainees in provincial or municipal/city jails or military camps, who have been confined for not more than 6 months at the time of enumeration of the household, except those who have been sentenced for more than 6 months (including those whose sentence is on appeal), even though just confined; and
- g. officers and crew members of coastal, interisland, or fishing vessels; officers and crew members of ocean-going vessels who usually go home to their household at least once a year.
- Boarders of the household who are working, looking for work or studying, and who do not go home at least once a week:
- 4. Employees of household-operated enterprises who eat and sleep with the household and who do not go home at least once a week:
- Persons (other than those in "3" and "4") whose usual place of residence is elsewhere, but who have been away from their usual place of residence for more than 6 months:
- 6. Members of the Armed Forces of the Philippines including draftees, sleeping most of the nights with the household, except those who only board or lodge with the household and who usually go home at least once a week; in such a case, they will be enumerated in their own household;
- 7. Persons found in the household who have no usual place of residence elsewhere;
- 8. Persons found in the household who are not certain of being enumerated elsewhere:
- Persons who consider the dwelling unit of the household as their usual place of residence but are living within the premises of a foreign embassy, ministry, legation or consulate, including non-Filipino employees who have been residents of the Philippines before such employment;
- Citizens of foreign countries and Filipinos (balikbayan) who have resided or expect to reside in the Philippines for more than one year from arrival;
- 11. Persons who sleep in the same dwelling unit but may not be able to take all or some of their meals with the household because of the nature of their work or other similar reason (they take their meals at place of work, etc.), should be considered as part of the household; and
- A household member who is alive as of 12:01 A.M., May 1, 1980, but dies prior to the enumeration of the household.

PERSONS TOTALLY EXCLUDED FROM THE ENUMERATION

Totally excluded from the population count of the Philippines were:

- Foreign ambassadors, ministers, consuls or other diplomatic representatives, and members of their households (except Filipino employees and non-Filipino employees who had been residents of the Philippines prior to said employment);
- Citizens of foreign countries living within the premises of an embassy, legation, chancellory or consulate:
- 3. Officers and enlisted men of U.S. Military or Naval Forces and non-Filipino members of their households, irrespective of residence; foreigners who are civilian employees in U.S. military or naval stations and member of their families living within the premises of said stations or reservation; (Note: for foreigners who are civilian employees of said stations living outside the station or reservation, see Item 5.
- Citizens of foreign countries who are Chiefs and officials of international organizations like UN, ILO or USAID, who are subject to reassignment to other countries after their tour of duty in the Philippines, and members of their families;
- Citizens of foreign countries together with non-Filipino members of their families, who are students or who are employed, or have business in the Philippines and have been in the Philippines or expect to stay in the country for one year or less from arrival:
- 6. Citizens of foreign countries and Filipinos with usual place of residence in a foreign country, who are visiting in the Philippines and expect to stay in the country for one year or less from arrival (e.g. a balikbavan who will return to his usual place of residence abroad after a short vacation or visit in the Philippines);
- 7. Citizens of foreign countries in refugee camps/vessels; and
- Residents of the Philippines on vacation, pleasure or business trip, etc. abroad, who
 have been away or expected to be away from the Philippines for more than one
 year from departure.

USUAL PLACE OF RESIDENCE

The term refers to the geographic place (street, sitio, barrio/barangay, municipality or province) where the enumerated person usually resides. As a rule, it is the place where he steps most of the time; hence, it may be the same as or different from the place where he was found at the time of the census.

HOUSEHOLD

A household usually consists of a group of persons who sleep in the same dwelling unit and have common arrangements for the preparation and consumption of food. A person who lives alone is considered as one separate household. Although in most cases a household consists of a related family group, some household members may have no relationship to the central group. Boarders and servants, for instance are counted as part of a particular household if they take their meals with the household and sleep in the same dwelling unit. Persons who sleep with a household but individually cook their meals or eat elsewhere are each considered as single-person household.

Three generations may be living in one dwelling unit. If they are divided into two or more groups whose eating arrangements are independent from each other, each group is counted as a separate household.

PERSONS NOT LIVING IN HOUSEHOLD

Falling under this category are persons living in collective living quarters such as welfare institutions (orphanages and homes for the aged or infirm); penal and corrective institutions (jails, national penitentiary, and reformatory institutions); hospitals, sanatoria, leprosaria, and nurses homes; dormitories and boarding schools; lodging houses such as hotels, tourist homes and the like; military camps and others.

Most of these institutions house immates for whom care or custody is provided by resident staff members, or persons residing in group quarters or in housing units on the institutional grounds.

Private families living within such institutions, however, are excluded from the classification, as well as persons (employees, students, etc.) who go home to their families on weekends or days off. Persons found in lodging houses, but who are on vacation or business trips and whose absence from home does not exceed six months on the day of enumeration, are likewise not counted as part of the institutional population.

RESPONDENT

A respondent is any responsible adult member of the household who furnished the information or answers to questions during the interview.

LANGUAGE/DIALECT GENERALLY SPOKEN IN THE HOUSEHOLD

This refers to the language or dialect spoken most of the time by members of the household. In cases where two or more languages/dialects are spoken by household members, the one most often used in conversations among members of the family of the head when most of them are gathered together is considered as the language/dialect generally spoken in the household.

HEAD OF HOUSEHOLD

The person responsible for the care and organization of the household is generally considered as the head of the household. He usually provides the chief source of income for the household.

In the case of a household consisting of two or more unrelated persons sharing a dwelling unit and sharing the same cooking facilities and meals, the head is usually the eldest male or female in the group regarded as such by the other members.

RELATIONSHIP TO HEAD OF HOUSEHOLD

This determines how each household member is related to the head, who is usually the husband or father, although in his absence or if incapacitated, the wife may be designated as head.

- Spouse a woman/man married to and living with the head. This includes legal marriages as well as common-law relationships.
- Son/daughter the head's own child, stepchild, or adopted child.

- Son-in-law/daughter-in-law refers to a household member related to the head by marriage to his daughter or son.
- 4. Grandson/granddaughter child of the son or daughter of the head.
- Other relative a household member related to the head by blood, marriage, or adoption. Father, mother, aunts, nephews, parents-in-law and cousins are examples.
- 6. Others any person in the household who is usually a non-relative of the head. Boarders and servants fall under this category. Certain members of the household who are related to the head by blood or affinity, but are actually boarders or servants in the household, are classified under "Others".

For collective households and group quarters, the question on relationship refers to the person's relationship to the institution or establishment, and not to the person recorded as head

AGE AND DATE OF BIRTH

Data on the age of the population were obtained by asking the respondent the month and year of birth and the age itself of the household member before May 1, 1980. To ensure accuracy, a conversion table on age before May 1, 1980 was prepared for the use of enumerators, editors/coders and verifiers.

MARITAL STATUS

This refers to the civil status of all persons 10 years old and over. A person in this age group is classified as single, married, widowed, separated or divorced, or civil status unknown, based on the following definitions:

- a Single If never been married.
- b. Married Legally married or living consensually with husband/wife without benefit of a legal marriage. A person classified as "married" includes one who remarried after having been widowed, separated or divorced or one temporarily separated from spouse owing to the nature of work, illness or service in the Armed Forces.
- c. Widowed A person whose spouse died and who has not remarried at the time of enumeration.
- d. Separated If permanently separated from spouse either legally or otherwise, due to marital discord.
- e. Divorced If bond of matrimony has been dissolved through a court decree and is therefore free to remarry.
- f. Unknown If civil or marital status is either not known to the respondent, or the respondent himself refuses to reveal the marital status of such person.

CITIZENSHIP

Citizenship is defined as the legal nationality of a person. A citizen is a legal national of the country of the census; an alien is a non-national of the country.

LITERACY

A person is considered literate if he is able to read and write a simple message in any insurance or district.

HIGHEST GRADE COMPLETED

This has reference to the specific grade or year completed in elementary school, high school, college or university, by persons 7 years of age and over. Academic degree holders are classified according to the title of the degree received or the major field of study undertaken.

LISUAL OCCUPATION

This refers to the specific job or kind of work that a person, who works most of the year, is usually pursuing, or if unemployed at the time of enumeration, it is the kind of twork he used to do most of the year. A person is considered as usually working most of the year if he works for at least 10 hours a week for 26 weeks either for pay in cash or in kind, for a fee or profit in own farm, business or establishment or practice of a profession and without pay on family farm or enterprise. This particular group of workers is referred to as gainful workers.

For persons who do not work most of the year, the usual occupation relates to the non-gainful activities they usually do most of the year. Among such persons are housekeepers, students, pensioners, retired and disabled. However, a person who is housekeeping or schooling and also works in a gainful activity was reported as gainfully employed, even if more time was spent housekeeping or studying, as the case may be.

INDUSTRY

Industry refers to the specific character and nature of business or industry or the place where the work is being performed in connection with the job or occupation reported for a person.

EVER-MARRIED WOMAN

This refers to a woman who has already entered married life. Marriage here may either be legal or consensual union. At the time of enumeration the ever-married woman may still be married, or already widowed, separated or divorced.

II - HOUSING

BUILDING

A building is any independent free-standing structure comprising one or more 100ms or other spaces, covered by a roof and enclosed within external walls or dividing walls with adjacent building which usually extend from the foundation to the roof. It usually contains one or more rooms internally connected with one another. A building therefore, is any structure intended for dwelling, storage, factory, shelter or for some other useful purposes.

For purposes of the 1980 Census of Population and Housing, only the following buildings were listed and assigned building serial numbers:

- a. A house or any kind of building or shelter where people were actually living.
- A residential building (house, apartment or accesoria, condominium) that was vacant;

- c. Hotel, motel, lodging house, dormitory or camp (construction, logging, mining, etc.) in operation:
- d. A commercial, office, industrial, agricultural or other kinds of buildings with one or more dwelling units (containing a kitchen/kitchen-dining room, living room and a bedroom, and with separate entrance) which were all vacant.

The different types of buildings are:

- Single house a complete structure intended for one household. It includes the so-called "nipa hut" or a small house that is built as a more or less permanent dwelling unit.
- Duplex a structure intended for two households, with complete living facilities for each. It is divided either vertically or horizontally into two separate dwelling units which are usually identical.
- 3. Apartment/accesoria/condominium/row house

An apartment is a structure usually of several stories, made up of three or more independent entrances from internal halls or courts. It differs from an accessoria in that an apartment has one common entrance from the outside.

An accesoria is usually a one or two-floor structure divided into three or more dwelling units, each dwelling unit having its own separate entrance from the outside. Another name for accesoria is row house.

A condominium is usually a high-rise building where the dwelling units are owned individually but the land and other areas and facilities are owned in common.

- Improvised (barong-barong) a makeshift or roughly constructed house usually built with salvaged materials.
- Commercial/industrial/agricultural buildings not intended for human habitation but used as dwelling units at the time of the census.

Commercial – a building used for transacting business or rendering professional services, such as a storage or an office building.

Industrial — a building used for processing, assembling, fabricating, finishing, manufacturing or packaging operations, such as a factory or a plant.

Agricultural - any structure used for agricultural purposes, such as a barn, warehouse, rice mill, etc.

6 Other housing unit (natural shelter, boat, etc.)

This refers to living quarters which are not intended for human habitation nor located in permanent buildings but which are, nevertheless, used as living quarters at the time of the census. Caves, other natural shelters and mobile housing units such as trailer, barge, boat, etc., fall within this category.

- Hotel, lodging house, dormitory, etc. This group comprises permanent structures
 which provide lodging and/or meals on fee basis. Hotels, motels, inns, boarding
 houses, dormitories, pensions and lodging houses fall within this category.
- Institutional (hospital/convent/school dormitory/penal institution, etc.) a building intended for persons confined to receive medical, charitable, or other care treatment such as jails and penal colonies, and other buildings like convents. school dormitories, etc.
- Other collective living quarters any structure or shelter which does not fall under items 7 and 8. Included in this category are camps which are defined sets of

premises originally intended for the temporary accommodation of persons with common activities or interests like military camps, and other camps established for the housing of workers in mining, agriculture, public works or other types of enterprises.

DWELLING UNIT

A dwelling unit is a separate and independent place of abode intended for habitation by one household, or one not intended for habitation but occupied as living quarters by a household at the time of the census.

Dwelling units counted included those that are occupied and those that are unoccupied.

CONSTRUCTION MATERIALS OF ROOF

The kinds of materials used are as follows.

- 1. Galvanized iron/aluminum
- 2. Tile/concrete/brick/stone
- Ashestos
- Cogon/nipa
- 5. Makeshift/salvaged materials
- Others (anahaw, etc.)

CONSTRUCTION MATERIALS OF OUTER WALLS

The kinds of materials may be any of the following:

- 1. Galvanized iron/aluminum
- 2. Tile/concrete/brick/stone
- Wood/plywood
- 4. Mixed tile/concrete/brick/stone and wood/plywood
- Asbestos
- 6. Bamboo/sawali
- 7. Cogon/nipa
- 8. Makeshift/salvaged materials
- Others (anahaw, etc.)

If the roof or outer walls are constructed of two or more materials the material most used was reported.

YEAR BUILDING WAS BUILT

This refers to the year when the extent of construction permitted occupancy for living purposes. The year reported was the particular year when the occupancy started or when the building was fit for occupancy even if not occupied.

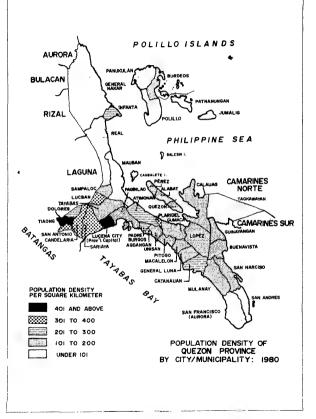

NUMBER OF ROOMS IN THE DWELLING UNIT

 $\Delta r > 0$ is defined as a space in a dwelling unit or other living quarters enclosed by walls $\gamma > 0$. In the floor to the ceiling or roof covering, or at least to a height of 1.8 meters $q_{11} > 0$ formagent or semi-permanent structure, of a size large enough to hold a bed for $q_{12} > 0$ at least has an area of 3 square meters.

The total number of rooms reported included the bedrooms, dining room, living room, kitchen, roofed veranda, library or music room and other separate spaces used or intended for dwelling purposes, as long as they meet the criteria of walls and floor space. Passageways, lobbies, bathrooms and toilets or rooms used exclusively as store/shop/clinic/grains storage (nobody sleeps therein) were not counted as rooms even if they meet the criteria.

FLOOR AREA OF DWELLING UNIT

This refers to the space enclosed by the exterior walls of the dwelling unit, or the space measured inside the outer walls of the spaces that are counted as rooms. In case of several floors, the area of each floor in square meters was taken and added together to get the total floor area of the dwelling unit. Areas of floor spaces that are not considered rooms such as bathroom, toilet, storeroom, passageway were excluded in determining the floor area.

Quezon: A Brief Analysis

Quezon: is one of the largest provinces in the country with boundaries extending as far as Aurora in the north and Camarines Sur in the south. The elongated province lines most of the eastern coast of Luzon, bounded on the northwest by Aurora and on the west by Bulacan, Rizal, Laguna and Batangas. Toward the south, the province divides into the west and east. The Tayabas Isthmus on the west projects southward into the sea, forming the Bondoc Peninsula. The Tayabas Bay and the Mompog Pass separate the province from Marinduque island in the west while the Caima Bay and the Ragay Gulf separate the peninsula from Camarines Sur in the east. The other southern end of the province curves into the east to join the boundaries of Camarines Sur and Camarines Norte. Included in the province are the islands of Polillo, Patnanungan, Jumalig, Alabat and Pagbilao Grande.

Quezon's topography is characterized by a rugged terrain. The Sierra Madre range runs almost the entire length of the province with Mt. Banahaw, the highest peak, rising to 2,177 meters. The mountainous areas provide timber stands for its logging industry and the long shoreline, resources for its fishing industry. Large tracts of grazing lai.ds and the availability of cheap feeds in the form of coconut by-products have encouraged the livestock industry. The entire province is so densely planted with coconut trees that copra making and the manufacture of dessicated coconut are among its main industries.

Much of the province, especially in the northern part, are still virgin lands. Geological surveys have reported the presence of gold, coal and oil in the Bondoc Peninsula. Quezon's total land area of 8,706.6 square kilometers, the second largest in Region IV, represents 2.90 percent of the total land area of the country.

The province has 40 municipalities and one city - Lucena City, the provincial capital,

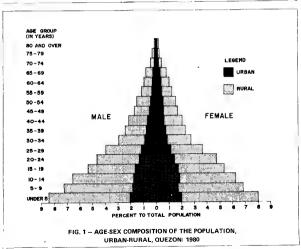

POPULATION

As of May 1, 1980, Quezon had a total population of 1,129,277, equivalent to 2.35 percent of the total for the country. The population figure indicated an annual geometric growth rate of 1.94 percent over the last five-year period, 0.65 percentage point lower from the 1970-1975 rate. Population density, on the other hand, moved up from 117.8 persons per square kilometer in 1975 to 129.7 in 1980.

A predominantly rural province in 1970 and 1975, Quezon has made little strides toward urbanization. Of the total population, 70.86 percent reside in rural areas and 29.14 percent, in urban areas. Compared to 1975, the proportion of urban populace is 1.24 percentage points higher. Likewise, a slight change was observed in the male and female proportions. Male and female urban residents increased by only 0.52 and 0.72 percentage points, respectively. Correspondingly, a decrease in the proportion of male (0.86 percentage point) and female (0.38 percentage point) rural residents was noted.

TABLE A – URBAN-RURAL POPULATION BY SEX, QUEZON: 1970, 1975 AND 1980

Area Classification	1980		1975		1970	
and Sex	Number	Percent	Number	Percent	Number	Percent
Total	1,129,277	100.00	1,025,902	100.00	902,865	100.00
Male	575,566	50.97	526,366	51.31	453,005	50.18
Female	553,711	49.03	499,536	48.69	449,860	49.82
Urban	329,098	29.14	286,247	27.90	269,361	29.83
Male	161,999	14.35	141,853	13.83	130,543	14.46
Female	167,099	14.79	144,394	14.07	138,818	15.37
Rural	800,179	70.86	739,655	72.10	633,504	70.17
Male	413,567	36.62	384,513	37.48	322,462	35.72
Female	386,612	34.24	355,142	34.62	311,042	34.45

From the group of persons under 5 years of age to 80 years old and above, the rural male and female population lessen as each age group becomes older. Urban male population follows the same pattern while urban female population deviates slightly from the usual pyramid configuration. Urban females 10-14 years old exceed those belonging to the 5-9 age group (Table 2).

The sex ratio (number of males per 100 females) of the population slightly decreased from 105.37 in 1975 to 103.95, the males still outnumbering the females. A similar pattern prevailed in the rural areas with the rural population attaining a sex ratio of 106.97. However, the reverse was true in the urban areas with the females outnumbering the males at a sex ratio of 96.95.

AGE COMPOSITION

The proportion of persons belonging to the younger age group (0-14 years) shows a downward trend. After decreasing from 47.39 percent to 46.01 percent, or by 1.38 percentage points between 1970 and 1975, it further decreased by 2.71 percentage points to 43.30 percent. However, the proportion of persons in the working or productive ages (15-64 years) increased from 51.18 to 53.18 percent, or by 2.00 percentage points. A slight increase is likewise noted in persons 65 years and over, or the older age group, from 2.81 percent to 3.52 percent. Consequently, the median age of the population has increased from 16 in 1975 to 17 years in 1980.

The rural areas have a higher proportion of the youth population than the urban areas; 45.29 percent of the rural population belong to the younger age group while only 38.48 percent of the urban population belong to the same age group. On the other hand, the proportion of persons in the productive or working age group is higher in urban (56.91 %) than in rural areas (51.64%). The same pattern holds true in the proportion of the older age group, with 4.61 percent of the urban population belonging to this age group compared to only 3.07 percent of the rural population.

Comparative figures on the age composition of the population are shown in the accompanying table:

TABLE B – AGE COMPOSITION OF THE POPULATION, QUEZON: 1970, 1975 AND 1980

Age	1980		1975		1970	
Composition	Number	Percent	Number	Percent	Number	Percent
Total	1,129,277	100.00	1,025,902	100.00	902,865	100.00
0 - 14 years 15 - 64 years 65 years and ov	489,031 600,487 ver 39,759	43.30 53.18 3.52	472,031 525,095 28,776	46.01 51.18 2.81	427,872 449,722 25,271	47.39 49.81 2.80

The dependency ratio (number of dependents for every 100 persons in the productive or working age group) for the province dropped from 95,37 in 1975 to 88.06 in 1980. Rural dependency ratio differed from the urban ratio by almost 18 dependents for every 100 persons in the productive or working age group, 93.66 for the former and 75.70 for the latter. Comparatively, the dependency ratio was higher among males (89.10) than among females (86.99).

MARITAL STATUS

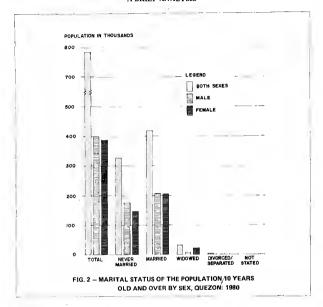

Of the total population 10 years old and over, 41.74 percent were never married; 53.38 percent, married; 4.25 percent, widowed and 0.57 percent, divorced or separated. Compared to 1975, these represented increases of 3.83 percentage points for the married; 0.59 percentage point for the widowed and 0.18 percentage point for the divorced or separated. The proportion of never married persons, however, dropped by 4.63 percentage points.

Married males totalled 52.66 percent of all males 10 years old and over, marking a substantial increase of 4.54 percentage points from that of 1975. The proportion of never married males, at 44.70 percent, decreased by 4.86 percentage points while those of the widowed and divorced or separated increased to 2.15 and 0.45 percent, respectively. Among the females, 38.69 percent were single, following a big 4.32 percentage-point decrease. The proportion of married, widowed and divorced or separated persons increased to 54.12 percent, 6.40 percent and 0.70 percent, respectively (Table 4).

Shown in the succeeding table is the classification of the population 10 years old and over by sex and marital status in three censal years:

TABLE C -- POPULATION 10 YEARS OLD AND OVER BY SEX AND MARITAL STATUS, QUEZON: 1970, 1975 AND 1980

Sex and Marital Status	1980		1975		1970	
	Number	Percent	Number	Percent	Number	Percent
Both Sexes	784,804	100.00	696,950	100.00	603,982	100.00
Never married	327,559	41.74	323,156	46.37	279,767	46.32

Not stated	341	0.09	114	0.03	305	0.10

HIGHEST GRADE COMPLETED

The proportion of persons with at least a year of elementary education remained at a high level, although it had dropped from 68.77 percent in 1975 to 65.69 percent of the private household population 7 years old and over. Those schooled until the high school level (19.99%) increased by 2.97 percentage points. A small percentage (5.04%) had attended college, while only 3.07 percent were academic degree holders. The proportion of persons who had no formal education as well as those who did not reveal their educational attainment decreased by 1.34 and 0.91 percentage points, respectively.

Of those who had elementary training, 30.47 percent finished at most the third grade; 18.66 percent, the fourth grade; 13.87 percent, the fifth grade and 37.00 percent, the sixth or seventh grade. Among those with high school education, 61.91 percent completed at least the first year, but no higher than the thir1 year while 38.09 percent graduated from fourth year. Majority (83.66%) of those who at ended college completed at most the third year while the rest (16.34%) finished fourth year or higher (Table 5).

The females registered higher proportions of college schoolers (5.12%) and academic degree holders (3.75%) than the males (4.96% and 2.41%, respectively). However, the former also registered a higher proportion of those who had no formal schooling (females -6.36%; males -5.72%). For those who obtained secondary and elementary education, the proportions were higher among males (20.64% and 66.09%, respectively) than among females (19.31% and 65.28%, respectively)

TABLE D – PRIVATE HOUSEHOLD POPULATION 7 YEARS OLD AND OVER BY HIGHEST GRADE COMPLETED, QUEZON: 1975 AND 1980

Highest Grade	19	80	1975		
Completed	Number	Percent	Number	Percent	
Total	877,832	100,00	784,861	100.00	
No grade completed	52,979	6.03	57,814	7.37	
Elementary	576,647	65.69	539,757	68.77	
High school	175,460	19.99	133,594	17.02	
College	44,236	5.04	27,693	3.53

Not stated	1,592	0.18	8,549	1.09	

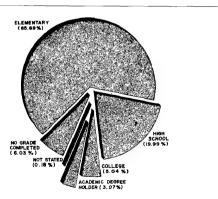

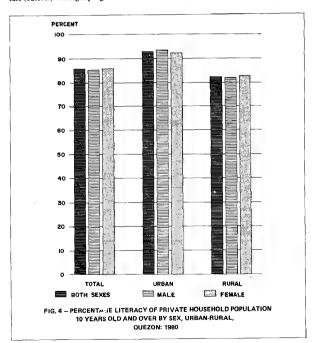

FIG. 3 – PRIVATE HOUSEHOLD POPULATION 7 YEARS OLD AND OVER BY HIGHEST GRADE COMPLETED, QUEZON: 1980

LITERACY

The literacy rate for the private household population aged 10 years and over was 85.69 percent. Urban areas had a higher rate of literacy than rural areas which may be attributed to the accessibility of more schools in urban areas. About 92.98 percent of the urban population were literate compared to 82.43 percent of the rural population.

The female literacy rate of 85.79 percent was slightly higher than the male's 85.60 percent. In urban areas, the males registered a higher rate than their female counterparts – 93.57 percent and 92.42 percent, respectively, whereas in the rural areas the female literacy rate (82.62%) was slightly higher than that of the males (82.26%).

xxvii

LANGUAGE OR DIALECT

Tagalog, the principal dialect, is spoken by 96.55 percent of the 207,886 private households in the province. Both the urban and rural areas are predominated by Tagalog-speaking households, 99.24 percent and 95.41 percent, respectively. Cebuano is spoken by 1.54 percent; Bicol, 1.20 percent; Lineyte-Samarnon (Waray), 0.41 percent and Masbate, 0.09 percent. The remaining 0.21 percent speak one of several other dialects reported in the province (Table 7).

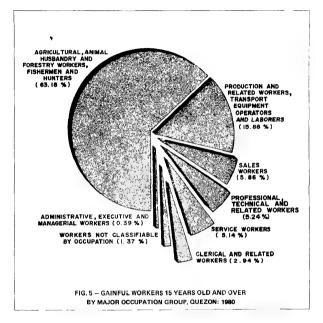

GAINFUL OCCUPATION

It should be noted that the 1975 data on gainful occupation and industry include Aurora, then a subprovince of Quezon. Inasmuch as tabulations of these items are on a provincial level only, it is difficult, if not impossible, to segregate the data for Aurora from the provincial total for Quezon. End users should therefore bear this in mind in evaluating the analysis for these topics.

A total of 323,594 persons or 50.64 percent of the private household population 15 years old and over are gainful workers. Agricultural, animal husbandry and forestry workers, fishermen and hunters make up the biggest group of gainful workers with 63.18 percent. Production and related workers, transport equipment operators and laborers trail far behind at 15.88 percent. Third in line are sales workers with 5.86 percent, followed by professional, technical and related workers with 5.24 percent. Service workers rank fifth at 5.14 percent while clerical and related workers come next at 2.94 percent. Administrative, executive and managerial workers constitute the smallest group with merely 0.39 percent.

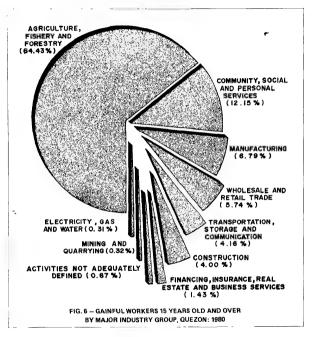

TABLE E – GAINFUL WORKERS 15 YEARS OLD AND OVER BY MAJOR OCCUPATION GROUP, QUEZON: 1980

Major	1980		
Occupation Group	Number	Percent	
Total	323,594	100.00	
Professional, technical and related workers	16,964	5.24	
Administrative, executive and managerial workers	1,252	0.39	
Clerical and related workers	9,528	2.94	
Sales workers	18,959	5.86	
Service workers	16,647	5.14	
Agricultural, animal husbandry and forestry workers, fishermen and hunters	204,430	63.18	
Production and related workers, transport equipment operators and laborers	51,382	15.88	
Workers not classifiable by occupation	4,432	1.37	

INDUSTRY

More than three-fifths or 64.43 percent of the total gainful workers in the province are engaged in agriculture, fishery and forestry. Ag cultural crop producers chiefly comprise this group (85.95%) with only 11.56 percent in fishery and 1.36 percent in forestry. Gainful workers engaged in community, social and personal services comprise 12.15 percent, with personal and household services (36.64%), education services (29.40%) and public administration and defense (17.73%) serving as the workers' principal concentrations. The manufacturing industry contributes only 6.79 percent and wholesale and retail trade, 5.74 percent. Transportation, storage and communication are engaged in by 4.16 percent; construction ...90 percent and financing, insurance, real estate and business services, 1.43 percent. Indi--use with the least number of workers are electricity, gas and water with 0.31 percent and mining and quarrying with 0.32 percent (Table 9).

MIGRATION

Out of 942,385 persons 5 years old and over, 94.65 percent lived in the same city/municipality where they had resided on May 1,1975. Only 2.82 percent were then residing in other municipalities within the province (intra-provincial migrants), while 2.44 percent were residents of other provinces (inter-provincial migrants). A negligible percentage of the population (0.09%) were residents of other countries. The females slightly outnumbered the males in two migratory movements - intra-provincial migration (1.44%, females; 1.38% males) and migration from other countries (0.05%, females; 0.04% males). The proportion of inter-provincial migrants, on the other hand, was slightly higher among the males (1.27%) than among females (1.17%). In each movement, majority migrated to rural areas (Table 10).

TYPE OF BUILDING

Majority (94.19%) of the 207,886 households in the province are occupying single houses. The rest are living in improvised structures such as barong-barong (2.59%), duplex (1.49%), apartment/accesoria/condominium/row house/etc. (1.08%), commercial/industrial/agricultural buildings (0.56%) and in other types of structures (0.09%).

Most of the households living in single houses are in the rural areas (71.92%); only 28.08 percent are in the urban areas. Similarly, a greater proportion of households living in improvised structures (62.55%), other housing units such as natural shelter, boat, etc. (90.43%) and hotel, lodging house, dormitory, etc. (57.69%) are in the rural areas. Occupants of other collective living quarters are entirely rural dwellers. As expected, more urban households are occupying duplex (70.42%), apartment/accesoria/condominium/row house/etc. (93.54%), commercial/industrial/agricultural buildings (70.16%) and institutional buildings like hospital, convent, school dormitory, etc. (61.54%). (See Table 1.)

The following table provides an insight into the housing conditions of households in Ouezon for 1980:

TABLE F - NUMBER OF HOUSEHOLDS IN OCCUPIED DWELLING UNITS
BY TYPE OF BUILDING, QUEZON: 1980

	1980		
Type of Building	Number	Percent	
Total	207,886	100.00	
Single house	195.813	94.19	
Duplex	3,103	1.49	
Aprtment/accesoria/condominium/	·		
row house/etc.	2.246	1.08	
Improvised (barong-barong)	5.372	2.59	
Commercial/industrial/agricultural	1,173	0.56	
Other housing unit: natural shelter	*,***		
boat, etc.	94	0.05	
Hotel, iodging house, dormitory, etc.	26	0.01	
Institutional (hospital, convent,	20		
	39	0.02	
school dormitory, etc.)	37	0.02	
Other collective living quarters	20	0.01	
(military camp, etc.)	20	0.01	

TYPE OF OCCUPANCY

Of the total number of households 173,485 or 83.45 percent are owners of their occupied dwelling units. The rest of the households are either tenants/lesses (9.43%), subtenants/sublesses (0.64%), or rent-free occupants (6.48%). Majority of the households in both urban (73.83%) and rural (87.56%) areas own the dwelling units they occupy (Table 1)

CONSTRUCTION MATERIALS OF ROOF AND OUTER WALLS

More than half (57.07%) of the households in the province reside in dwelling units constructed with roofs of light materials such as cogon/inpa, makeshift/salvaged materials, or other materials like anahaw, etc. The remaining 42.93 percent have roofs of strong materials such as galvanized iron/aluminum, tile/concrete/brick/stone, or asbestos. Of the urban households, 69.38 percent occupy dwelling units with roof of strong materials and 30.62 percent, of light materials. Dwelling units of most rural households (68.35%), however, are constructed with roof of light materials.

Strong materials (galvanized iron/aluminum, tile/concrete/brick/stone, wood/pl/wood, mixed tile/concrete/brick/stone and wood/pl/wood, and asbestos) are used for outer walls by more than half (52.69%) of the total households. This also holds true for households in the urban areas where 81.26 percent are living in dwelling units with outer walls built of such materials. On the other hand, a higher proportion of the rural households (59.49%) reside in dwelling units with outer walls built of light materials (bamboo/sawali, cogon/nipa, makeshift/salvaged materials and others such as anahaw, etc.) than of strong materials (40.51%). (See Table 2.)

YEAR BUILT

Of the total households, 48.87 percent are occupants of dwelling units built in 1976-1980; 20.07 percent, during 1971-1975; 16.94 percent, 1961-1970; 8.63 percent, 1951-1960; 2.86 percent, 1942-1950 and 2.63 percent, before World War II, i.e., 1941 or earlier (Table 2).

FLOOR AREA OF DWELLING UNIT

Table 3 shows that 58.70 percent of the total households occupy dwelling units with floor area less than 30 square meters; 25.51 percent live in 30-49 square-meter dwelling units; 7.20 percent, 50-69 square meters and 4.19 percent, 70-99 square meters. A few households have spacious dwelling units with floor area ranging from 100-149 square meters (2.31%) and 150 square meters and over (2.09%).

TENURE OF OWNER-OCCUPANT WITH RESPECT TO THE LAND

Of the 175,485 households in owner-occupied dwelling units, 44.67 percent also own the land where the structure is crected. The rest are distributed as follows: 14.59 percent, lessee or sublessee; 19.86 percent, farm lessee/agricultural tenant of landowner and 7.27 percent, other legal tenure. Households having no tenure to the land (squatter, etc.) constitute 13.61 percent (Table 4).

KIND OF LIGHTING FACILITIES

Kerosene, the most common type of lighting facility in the province, is used by 70.01 percent of the total households. More than one-fourth (26.11%) use electricity; 3.40 percent use liquefied petroleum gas and 0.48 percent, oil and other kinds. Majority of the rural households (85.22%) use kerosene; 9.67 percent use electricity; 4.52 percent, liquefied petroleum gas and 0.59 percent, oil and other kinds. On the other hand, a higher proportion of the urban households use electricity (64.68%) than kerosene (34.31%). Users of liquefied petroleum gas, oil and other kinds of lighting facilities constitute 0.79 percent and 0.22 percent, respectively (74able 5).

SOURCE AND USE OF WATER SUPPLY

More than one-third of the households in Quezon province obtain water from the dug well for drinking (34.24%) and for kitchen use (36.05%). For washing clothes, however, 31.72 percent depend on lake, river, stream, etc. and 23.64 percent, on dug well. Over one-fourth, or 28.93 percent use water from the faucet, community water system for drinking; 26.80 percent, for kitchen use and 20.23 percent, for washing clothes. The rest of the households rely on other sources of water supply as follows: for drinking, 13.99 percent rely on tubed or piped deep well; 11.22 percent use spring; 8.81 percent, tubed or piped shallow well; 2.62 percent, lake, river, stream, etc. and 0.19 percent, rain. For kitchen use, water from spring is utilized by 10.53 percent; tubed or piped deep well, 14.10 percent; tubed or piped shallow well, 8.77 percent; lake, river, stream, etc., 3.59 percent and rain, 0.16 percent. For washing clothes, however, 10.29 percent depend on tubed or piped deep well; 7.91 percent, spring; 5.91 percent, tubed or piped shallow well and 0.30 percent, rain (Table 6).

TOILET FACILITIES

Thirty percent of the total households are without toilet facilities. About 23.89 percent use the open pit; 16.17 percent, closed pit (antipolo, etc.); 15.77 percent, watersealed with sewer or septic tank; 10.76 percent, water-sealed with other depository and 3.41 percent, other types (pail system, etc.). Households in urban areas have better toilet facilities than their rural counterparts. More than two-fifths (40.85%) of the urban households use the water-sealed with sewer or septic tank; 18.28 percent, water-sealed with other depository; 9.92 percent, closed pit; 8.98 percent, open pit and 5.66 percent, other types. Among rural households, only 5.07 percent have water-sealed with sewer or septic tank; 7.55 percent, water-sealed with other depository; 18.84 percent, closed pit; 30.24 percent. open pit and 2.46 percent, other types. Households without toilet facilities comprise 16.31 percent in urban areas and 35.84 percent in rural areas (Table 7).

COOKING FUEL

Wood or charcoal is widely used for cooking by residents of this province. Table 8 shows that 82,97 percent of the total households use wood or charcoal. The remaining 17.03 percent use either kerosene (8.92%), liquefied petroleum gas (5.43%), electricity (2.25%), or other kinds of cooking fuel (0.43%).

The predominant use of wood or charcoal is observed in both urban and rural areas, registering 65.47 percent for the former and 90.43 percent for the latter. The use of lique-field petroleum gas is more common in urban areas with 14.95 percent as compared with 1.37 percent in rural areas.

OWNERSHIP OF RADIO, TELEVISON SET AND REFRIGERATOR/FREEZER

Almost two-thirds (65.29%) of the total households own radios. However, television sets and refrigerators or freezers are not very common among households in the province with only 8.01 and 7.48 percent, respectively, possessing them.

As observed in Table 9, households with radio are very common in both urban and rural areas (urban - 69.90%; rural - 63.32%). Urban households with television set (21.11%) and refrigerator or freezer (20.22%) constitute a greater proportion compared to television and refrigerator or freezer owners in the rural areas (2.42% for the former and 2.05% for the latter)
